4. Once you have each finished your own sections, you should now consolidate the individual sections and make one paper for the entire group to submit. **Include a header for each section in combined paper that clearly outlines the beginning of each section**
5. Perform a peer review among your group members, making sure everyone proofreads the document. Not only should the quality of each section be checked, but the quality of the paper as a whole. Make any necessary changes to the document as a group.
6. It is pertinent at this point to make clear that this is a group assignment in every sense, and as such you will all be scored together. You should verify that everyone's contributions are not plagiarized from the internet. If your document contains substantial portions of plagiarized text, *all* members will be penalized.
